MANAGEMENT'S DISCUSSION AND ANALYSIS

1. OVERALL REVIEW

In the previous year, while analysing and discussing the performance of the Company and the Industry in general, the Management anticipated certain threats and challenges like, over capacity in Polyester POY, heavy imports of Nylon Filament Yarn / fabrics and higher fuel oil and gas prices. In the year under review, as expected, it happened and remained throughout the year and impacted the performance of the Company. The Company, proactively reviewed the emerging adverse market scenario, and as a part of risk management, suspended operations at Mahad site in the month of May 2012. To further reduce the adverse impact of these factors, the Company curtailed production of Nylon Filament Yarn (NFY) at Pune and Polyester POY at Bharuch. Coordinated corrective measures have helped the Company. Nylon Tyre Cord Fabric (NTCF) capacity including dipping, was fully utilized at Bharuch Plant. Overall, the performance was satisfactory due to purchase of power under open market operation resulting in reduced energy cost and general improvement in operational efficiency.

2. INDUSTRY STRUCTURE, DEVELOPMENT, THREATS & OPPORTUNITIES

The Company produces Polyester POY, NFY and NTCF which fall within the broad industry category of Synthetic Fibre. The major input cost of this industry is comprising of petroleum based products, fuel oil and gas. It accounts for about 80% to 85% of the total manufacturing cost.

The long term growth and development of this industry is fairly secured because of low base per capita consumption of textile fabric and tyres in India as compared to developed countries. In a growing economy with high population, it gets additional support. In the short term, volatility in crude oil prices may impact the growth of the industry.

The profit margins of the industry eroded in last two years mainly due to addition of large capacity of Polyester POY and import of NFY. Substantial import duty concessions, under FTAs signed by the Government of India with ASEAN member countries has become the bane of the industry and emerged as a major threat for the Synthetic Fibre Industry including NTCF. The anti dumping duty on NTCF on imports from China / Belarus is expiring in March 2014, which, if not extended will be a major threat to NTCF.

3. COMPANY OUTLOOK

Demand of NTCF is sustained and both the plants at Bharuch and Pune are operating at full capacities, however duty concessions under FTAs and renewal of anti dumping duty on NTCF will be critical to the survival of NTCF. Margins are under pressure because of surplus capacity in Polyester POY and higher import of NFY. Energy is a major cost component. As a risk managing measure, the Company is pursuing with Maharashtra State Electricity Distribution Company Limited to allow the Company to

purchase power under open market operation for its Pune plant. The neighbouring State of Gujarat, where company's another plant is located, offers such a facility.

Introduction of Value Added Tax (VAT) @ 5% on NTCF in Maharashtra and increase in Local Body Tax (LBT) @ 2.4% on all inputs including the main raw material as compared to Octroi rate of 1.55% for Pune plant will severely affect profit margin.

The outlook in near term as well as long term remains cautiously positive.

4. RISK MANAGEMENT

The Management reaffirms that the Company has in place a process to identify risk and take remedial action that can mitigate the risk. The Company continues to follow a policy of hedging currency exposure. This has helped in managing finance cost better.

In the year under review, the Company has been able to contain the increasing risk of energy cost by purchase of power under open market operation. The competition among various players of the industry has increased substantially due to over capacity in Polyester POY. The Company is restructuring its Polyester operations at Bharuch site to create dual facilities to manufacture Polyester POY and NFY and of different types of lustres to improve margins. As regards increased demand of dipped NTCF from tyre companies, the Company is proposing to expand dipped NTCF facility at Bharuch site.

The Board of Directors is apprised of the developments in Risk Management in periodical meetings where the quarterly results are approved.

5. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

The Management reaffirms that internal control systems and procedures in the Company are commensurate with nature and size of its business and are regularly reviewed and updated by incorporating changes in regulatory provisions to ensure that not only the assets of the Company are safeguarded and protected against any loss, but all the transactions are properly accounted and that they meet the test of legal compliance.

Apart from regular review and monitoring the internal control systems and procedures by the Company's Internal Control Department, two independent Chartered Accountants firms have been appointed to conduct the internal audit of the Company's operations. This provides reasonable assurance to the effectiveness of the internal control systems and procedures and reliability of financial reporting.

6. INFORMATION TECHNOLOGY

The Company is of the firm belief that Information Technology (IT) is a key enabler for employee productivity and business efficiency. Every business function of the

Company is well supported by a customised Enterprise Resource Planning (ERP) system to carry out its business processes and to take care of all transaction processing needs.

IT systems are developed to deliver long term commercial benefits and allow the organisation to respond rapidly to both market and customer needs.

Integrating systems with the key customers has enabled the Company to track enquiries and monitor sales, leading to better customer service.
